

# Burgundia Side Cabinet Installation Instructions

- ☐ Insert the metal stud screws through the wall brackets. Secure and fasten with drill bits.
- ☐ The wall bracket should be installed on at least one stud for optimal installation.
- ☐ For use in the dry area of the bathroom, sealing panels are recommended.

## Maintenance

Check the bracket connections and brackets at least twice a year to make sure they are secure. Due to constant use, some connections may become loose.

If the customer does not follow the instructions for correct installation because the product falls down or falls apart, this has nothing to do with product quality.
